SKILLS

PROFILE

I am Kautilya Tripathi and am currently pursuing Bachelor of Engineering in Computer Science from International Institute of Information Technology, Bhubaneswar. I am self taught Web and Android Developer with 2 years of experience. My love for web development started with HTML and CSS. Once I understood the language I started to build some advanced CSS projects and took a dive into bootstrap. I learned JavaScript, which helped me to understand the concept of web pages. After that I started learning JQuery and BackEnd Development. I did several projects in FreeCodeCamp and earned FrontEnd Developer Certificate. I also worked on various BackEnd projects in FreeCodeCamp. Along with that I also did projects which combined both FrontEnd and BackEnd development. You can find below the list of projects I have done so far. Recently I started combining my knowledge of Web development in Android Applications and made one successfully. Looking forward to make some more interesting Apps in future.

PROJECTS
